

<b>Technical features</b>	<b>TEC 60EV</b>
Engine	Honda GX390
Rotation speed	3000 rpm
Max. power output	7000 watts 230v / 12 Vdc
Frequency	50 Hz
Starting	Electric
Noise level	66 dBa @ 7m
Max fuel consumption	3.7 Lt/h
Dimensions L W H	54.4x62.6x47.4 cm
Weight	102 kg.

## Dometic TEC 30EV Diesel Generator

Dometic TEC 60 is a highly compact and lightweight generator fuelled by petrol. Ideal for fitting under the vehicle floor of RV's and live in horse boxes, it provides 6200W of continuous high quality power suitable for sensitive electrical equipment and is also extremely efficient, with minimal noise. Its convenient auto start function starts the generator to recharge a battery as soon as its voltage becomes low. Like all Dometic generators the TEC 60 is supplied complete with remote control. There's no reason to ever be without power!

It's compact and lightweight, it operates quietly and very efficiently. The clean sine wave voltage it provides makes it suitable for sensitive electronic devices.

- Only 66dBA at 7 metres
- 6200W Continuous output
- 7000W maximum output
- Start/Stop control panel included
- 12-volt 30A output for battery charging

Robust design in stainless steel casing

Included with this Generator - Remote control panel + 5m cable, 2m flexible exhaust pipe, change over switch, clamps, fuel filter, cut out template, user and installation manuals
